

Stopping fraud and forgery with Proof Defend

Enable ProofSM Defend to secure every notarization, signature and identity verification transaction. Real-time fraud monitoring analyzes the multiple dimensions of an identity to flag transactions when there's suspected fraud or attempted forgery of a signature.

A layered approach to identity verification

A single point solution for identity verification is no longer enough for preventing fraud. With Proof, you can customize and layer our services to fit your risk for each transaction.

SMS Multi-Factor

Credential Analysis

Selfie Match

Liveness

Knowledge Based Authentication

NIST IAL2 Certified Verification

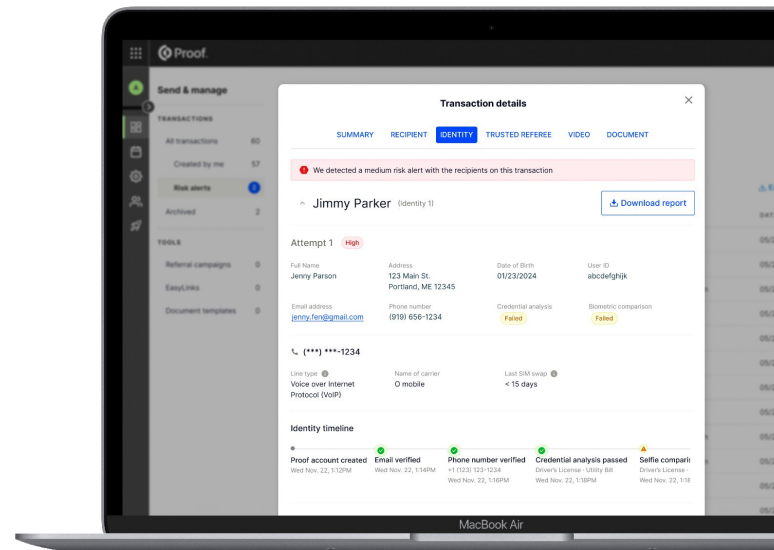

Trusted Referee Fallback

Third Party Database Verification

Make better decisions based on real data

With each transaction you'll be presented with real-time risk alerts, allowing your team to make informed decisions. Proof Defend includes:

- ✓ Sophisticated insights about the identity's phone number, email, and IP address.
- ✓ A decision engine scores the risk with a High, Medium or Low rating on every transaction.
- ✓ A dashboard that makes it easy to find the transactions that need your review.
- ✓ Real-time alerting via email and API webhooks when fraud may have been detected.
- ✓ All the evidence is provided via a tamper-sealed Proof Identity Report.

About Proof

Proof is the trusted platform for the most important agreements that businesses and consumers sign. More than 7,000 businesses trust Proof to collect all types of documents – everything from an online notarization to identity-assured eSignatures. The platform combines strong identity verification with built-in fraud prevention to ensure signatures are harder to forge. Proof operates the Notarize Network, the largest on-demand network of trusted notaries that are available 24/7 to perform a notarization or check a person's identity.
